

Cohda Wireless™

**Invitation to meet Cohda Wireless at CES 2016
6-9 January 2016, Las Vegas, USA**

The V2X market continued to advance in 2015. The US DOT announced plans to pull ahead the NPRM requiring car makers to install V2V devices in their vehicle. The US DOT also awarded \$43M to three projects to help accelerate infrastructure deployments. Cohda Wireless had a successful ITS World Congress in Bordeaux with the first demonstration of V2X-Radar.

At the forefront of 5.9GHz DRSC technology solutions for car-to-car (V2V) and car-to-infrastructure (V2I) in the US and European markets, Cohda Wireless offers unmatched experience and maturity to its customers.

Cohda's technology leadership will be highlighted in the booth of our strategic partner, NXP Semiconductor, conveniently located in the Central Plaza in front of the convention center.

QNX will also have a compelling in-vehicle demonstration of V2V and V2I applications featuring Cohda's MK5 OBUs and RSUs.

Please contact me at bernd.luebben@cohdawireless.com to schedule a meeting with Cohda senior management. Otherwise, please stop by at the NXP booth at your convenience. We look forward to speaking with you during CES 2016.

Best Regards,

Bernd Luebben
Vice President Business Development
Cohda Wireless Europe GmbH
