

## Mining Example

## Mining

---

As mining companies constantly seek a competitive advantage in a price sensitive industry, research shows that autonomous vehicle operations can increase productivity by 15 to 20 per cent and truck uptimes by up to a fifth.

Solving major subterranean positioning problems facing the industry. Cohda Wireless has become the supplier of choice to METS and mines.

**ENHANCING SAFETY IN THE MOST  
CHALLENGING OF ENVIRONMENTS**

# Rio Tinto Underground Trial

*Cohda is playing a pivotal role in developing underground positioning technologies and applications*

## Kennecott Utah Copper (KUC) Trial

***Cohda's V2X-Locate technology proving that it plays a vital role in supporting operations underground and above - reducing accidents and improving productivity***
